

Remarks

Applicants appreciate Examiner's allowance of the claims.

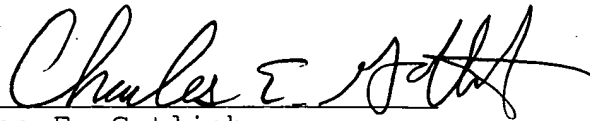

Claims 23-43 are allowed, but are being amended
5 to correct a minor typographical error in which the
"voice recognition" is referred to as the "first voice
recognition". The amendment ensures that the "voice
recognition" is referred to using the same terminology
throughout the claim. No change in claim scope is
10 intended by this amendment.

No new search is required because the amendment
is just changing the identifier of a reference to
ensure that there is proper antecedent basis, though
everyone (applicant's attorney, Examiner and the
15 Appeals Board) reviewing the claims appears to have
understood that the "first voice recognition" referred
to the "voice recognition". The scope of the claims
have not changed.

Favorable action is solicited.

Respectfully submitted,
September 20, 2005
